

## Research & Development Cell-Code of Ethics

In research and publication, ethics are the vital components to maintain the decorum of the research policies of the institute. Very often, it is observed that plagiarism content in the manuscripts or thesis by the researchers knowingly or unknowingly will damage the reputation of the institution.

- One research advisory committee has been constituted comprising of chairman (Principal), R&D co-ordinator and one member from the R&D cell of the institute to monitor the research works of the faculty, PhD scholars and PG students who do the academic research works and produce their work in the form of Thesis, Publications and Project report.
- All the works produced by the researchers of the institute in the form of Thesis, Manuscripts and conference presentations must be screened for plagiarism and allowed to submit the same work if it is within the permissible limit to maintain the standards of our institute.
- The Research Guide and Scholars (M.Phil & Ph.D) are instructed to utilize the plagiarism detection software available in our affiliating university for detecting plagiarism.

The members of the committee

- |   |    |              |
|---|----|--------------|
| 1. Dr. V. Radhakrishnan, Principal                      | -- | Chairman     |
| 2. Dr. G. Saravanan<br>Head, Department of Biochemistry | -- | Co-Ordinator |
| 3. Dr. M. Venkatesh<br>Head, Department of Physics (UG) | -- | Member       |
